

HYDRAULIC AIR COMPRESSORS

HK / HKL Series

GENSCO

DYNASET

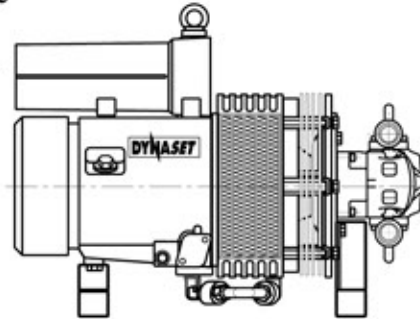

DYNASET HYDRAULIC COMPRESSORS CONVERT HYDRAULIC POWER INTO COMPRESSED AIR. DYNASET COMPRESSOR UNITS ARE OF COMPACT CONSTRUCTION AND DESIGNED FOR EASY INTEGRATION INTO A HYDRAULIC SYSTEM OF ANY MOBILE OR STATIONARY MACHINE.

HK Series DYNASET hydraulic piston-style air compressors. HK units are comprised of a frame-integrated pressure reservoir, relief and safety valves, pressure gauge, as well as, automatic speed control valve. HK compressors are designed to meet basic compressed air requirements such as pneumatic hand tools, cleaning and general service work.

HKL Series DYNASET hydraulic rotary vane air compressors. HKL units are provided with coiled lubrication system, oil separator, relief valve on the air intake and automatic speed control valve (up to HKL 1800). HKL compressors are to be installed on excavators, mining, and other large mobile machinery. HKL compressors are designed for continuous operation in demanding conditions.

HKL hydraulic compressor is a perfect substitute for towed compressor plant !!!

	COMPRESSED AIR		HYDRAULIC REQUIREMENTS		WEIGHT lbs
	air flow	pressure	oil flow	pressure, max	
	cfm	psi	gpm	psi	
HK 400/8-23	14	116	6	3046	106
HK 1000/12-35	35	174	9	3046	176
HKL 800/10-26	28	116	7	3046	110
HKL 1300/8-38	46	116	10	3046	121
HKL 1800/8-46	64	116	12	3046	143
